Subject: CJK Engineering

To whom it may concern

Solar AdTek has engaged CJK Engineering on several projects over the past 4 years. In each case CJK has proven itself to be more of a partner than sub-contractor in resourcing projects with experts in the fields of Health & Safety (H&S), Electrical, Mechanical and Construction.

Our projects included the energy efficient LED lighting upgrade of advertising poster displays boxes and courtesy lighting on all bus shelters for Dublin Bus and Bus Eireann nationally, Dublin Luas platform advertising column lighting and the complete installation of a solar powered bus shelter for Dublin Airport. CJK managed these projects from the generation of the Risk Assessment/Method Statements, to the removal and appropriate disposal of the existing equipment and the installation/testing of the new lighting. CJK added a signoff procedure which provided weekly updates, and visual proof, of sites completed. These reports were invaluable as a means to provide progress updates to our clients.

As an electronics company Solar AdTek focusses on the design and development of innovative solar and lighting solutions and having a partner like CJK to install our products to such a high standard is invaluable. In each of the above cases the sites were on public road infrastructures where H&S concerns are heightened. CJK took on this responsibility and provided the necessary resources in personnel and materials to ensure each project was completed without incident and ahead of schedule.

We are happy to recommend CJK Engineering and to endorse the high quality of service that they provide. We look forward to working with Conor and Brendan on future projects.

Best regards,
