

To whom it may concern,

We Nuritas can confirm that CJK Engineering undertook the full electrical installation of our new premises, their approach from the beginning to the end was very professional, considerate and accommodating.

Their standard of works was of a high quality such that snagging was at a minimal. The punctuality with which the works were managed was precise. The completion and commissioning was also well managed.

I would have no hesitation in recommending CJK Engineering to any perspective Client and look forward to engaging them on future projects as they can be relied upon in all aspects of their works.
